# Ernest Raday

Sykesville, MD | 301-525-5642 | ernestjraday@gmail.com | linkedin.com/in/erad | github.com/ejrad | U.S. Citizen

## Education

**James Madison University** Harrisonburg, VA
*Bachelor of Science in Computer Science* *Aug. 2024 – Expected Graduation May 2028*

- **Relevant Coursework**: Intro to Programming, Advanced Programming, Discrete Structures I & II, Software Engineering, Data Structures, Computer Systems I, Computer Information Systems
- **Activities**: Cyber Defense Club, Boarderline Ski & Snowboard Club, JMU NCCDC '27 as Intrusion Detection & Logging
- **CTFs**: Bandit OverTheWire, NSA Codebreaker Challenge 2026, 2026 Sunshine CTF, PicoCTF/CyLab

**Carroll County Community College** Carroll County, MD
*Dually Enrolled in High School* *Aug. 2023 – May 2024*

## Technical Skills

**General Skills**: Linux Fundamentals, Agentic Programming & Prompting, Scripting
**Languages**: Java, Python, JavaScript, HTML/CSS, Lua/LuaU
**Developer Tools**: Github, VSC, Antigravity, Cursor, VMWare Workstation, Splunk
**Currently Learning**: C, Kali Tools, SQL, Networking, Advanced Linux, HackTheBox Labs
**Certifications**: TryHackMe Pre-Security SEC0 | Studying for CompTIA Security+ & THM SOC Level 1

## Experience

**Freelance Game Developer** | *Monetization, Budgeting, Agentic Programming* 2022 – 2026

- Collaborated with developers internationally to create revenue-generating projects in Roblox Studio
- Managed a budget set by project funders, using it to hire other freelance developers for individual tasks
- Provided continued programming support for clients, shipping new and updated features
- Created databases, client-server architecture, integrated third-party APIs to track analytics

## Projects

**Clone Sandbox Game** | *LuaU, Roblox Studio, Cursor IDE, Roblox MCP* Aug 2025 – May 2026

- Designed UX for monetization, optimizing key metrics for algorithmic performance
- Generated $10k+ revenue through content monetization with over 20% conversion rate
- Resolved DMCA dispute with an IP owner through negotiation to prevent lost revenue
- Leveraged Agentic Programming via Cursor and Antigravity IDEs by using a Roblox MCP Server

**2D Platformer** | *Javascript, p5.js, VSC IDE, Cursor IDE* Mar 2026 – May 2026

- Created a 2D platformer using the p5.js library for a Software Engineering class project
- Collaborated and resolved conflict with a team of 4 other students to create a project during a semester
- Planned features, designated tasks, and held teammates accountable by managing a Scrumboard
- Within project guidelines, used Agentic Programming to solve problems and guide development

**Custom Developer Script Tool** | *VSC, Python, REST APIs, CLI Design, Selenium* July 2025

- Built a Python tool utilizing REST APIs as a supplementary tool to another product that I sold
- Authenticated actions via session-cookie and CSRF capture using Selenium
- Created a CLI with Rich, which exported data to JSON, CSV and a LuaU-parsable table
